

SUMMER ASSIGNMENTS

The following is an overview of your child's required reading assignments for the summer months. Please see the assignment sheets for each grade level, posted on our website, for a more detailed summary of summer assignments. Please note that, beginning this year, summer math assignments will not be mandatory. Teachers have put together recommended math assignments, but these assignments will not be graded or tracked, and will simply be an option for families who wish to work on math over the summer.

SUMMER READING ASSIGNMENTS

Every child entering grades 1-8 is expected to complete a summer reading assignment. Upon completion of each book, students in grades 2-5 are asked to complete an activity from the Summer Reading Menu, found on our website, for **ONE** of the books.

Students in grades 6-8 are to read a fiction book of their choice and complete the book report form, found on our website. If students are looking for suggestions, they can refer to our middle school and diversity reading lists. Students in grades 6-8 are also required to read an assigned text, which will be covered in class at the beginning of the year. These completed forms **must be submitted by Friday, September 6th**. Please note that separate requirements for students entering grade 1 are found on their assignment sheet.

RECOMMENDED SUMMER MATH ASSIGNMENTS

We highly recommend students complete summer IXL assignments. While these assignments are not mandatory, completing them will help prevent learning loss and promote confidence as students prepare for their next grade level. Teachers have put together recommended IXL skills for students to work on if they would like. Unless otherwise indicated, the exercises should be completed at the grade level your child is now finishing. Please note that IXL occasionally adds skills over the summer, which affects the skill numbers. If skill numbers do not match what we have, follow the description of the skill, rather than the skill number. Additionally, any skills related to the ones listed will provide good practice.

We are confident that the summer math and reading assignments will help our students to keep their skills fresh, while also allowing for plenty of time to relax and refresh.

We wish you and your family a wonderful summer!
